Lab-1

What is a Project?

A **project** is a temporary activity with a clear start and end, aimed at producing a unique product, service, or result. It is goal-driven and constrained by time, cost, and resources.

Examples of IT Projects

- Developing a company website.

- Migrating databases to the cloud.

- Implementing cybersecurity measures.

- Creating custom software (e.g., CRM).

- Upgrading network infrastructure.

Benefits of IT Projects

- Improved efficiency and automation.

- Reduced operational costs.

- Stronger competitive advantage.

- Enhanced data security.

- Better decision-making through analytics.

- Scalable and future-ready systems.

- Higher customer satisfaction.
